

Off-Road Components

Performance with Proven Durability

The full-sized excitement of off-road riding. Now it's for everyone! In the latest off-road mountain quality components.

Thoroughly researched the locations and features of the mountain bike, Shimano has applied the same technology that went into its through-the-road racing components.

The result? Components that are tough, able to stand up to the toughest riding conditions. The better suited on those rugged roads. Better features. And with the strongest technology in today's mountain bike world. All for a new kind of ride—in the mountain, across fields or even in town.
