ELECTRONIC

# VEKTAR

The Raleigh Vektar is no ordinary bike. For the first time ever it combines micro-chip technology with the strength and durability of BMX. Using the most reliable C.Mos silicon technology, the computer displays a whole range of time and distance information on top of a permanent display that shows how fast you're travelling.

Another unique feature is our sound synthesizer. From the handlebars you can operate eight pre-programmed electronic sounds.

As well as being the most technically advanced machine around, Vektar is as tough as any BMX.
