IBOC TEAM

Mongoose has built state-of-the-art off-road bicycles for nearly 20 years. With the introduction of our 1991 line, Mongoose once again leads the cycling world in advanced technology and innovation.

Our premier line of ATB's — the Mongoose IBOC series — features refined monostay frames, competition designed radius blade forks with leading axles, high-performance Araya alloy rims, aggressive all-terrain tires, IBOC Gel racing saddles, and specially designed handlebars and stems. Mongoose quality and performance is unmistakable in our IBOC line, but it doesn't stop at the top.

Every model in the complete Mongoose all-terrain line features indexed shifting, anatomically proportioned handlebars, stems, and crank arms, soft comfortable saddles, quality tires with functional multi-purpose tread designs, quick-release front wheels, and sure-stopping cantilever brakes.

Sophisticated graphics and paint finishes distinguish Mongoose bicycles from conventional ATB's and set you apart from the crowd. Mongoose bicycles are available in a variety of styles and sizes -- from 24-inch junior men's and women's models all the way up to our highly sophisticated racing designs. Mongoose offers the right bike to satisfy everyone's cycling needs.

BRITISH PASSPORT

IBOC SIGNATURE

The IBOC Team features the same geometry as our legendary Signature frame. It is handcrafted with lightweight chromoly double-butted tubing. Each frame joint is TIG welded to perfection. Its high performance oversized leading axle front fork enhances handling during climbs and descents. The IBOC Team is equipped with Shimano Deore XT components with STI, Superglide, Hyperglide, and SLR. Panaracer Smoke tires mounted on 32-spoke Araya RM-14 rims make the IBOC Team ready to race right off the floor. The IBOC Team is built to dominate — PERIOD.

MONGOOSE

Introducing the world's finest mountain bike and frame set. The IBOC Signature frame set isn't for everyone — only serious competitors who demand the best. The IBOC Signature frame is handmade in a special argon chamber using only U.S. government certified titanium and aircraft-quality 4130 chromoly. The Signature's titanium main frame is specially bonded to its double-butted chromoly rear triangle for superior strength. For unequalled steering and handling response, the Signature frame features a Tange Switchblade fork constructed with a lightweight lost wax alloy crown and Tange prestige blades. At under 3 kilograms, the IBOC Signature ranks among the lightest frames available in the world. The IBOC Signature has the distinction of winning more world mountain bike championships than any other frame made.

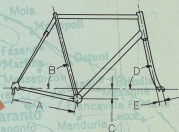

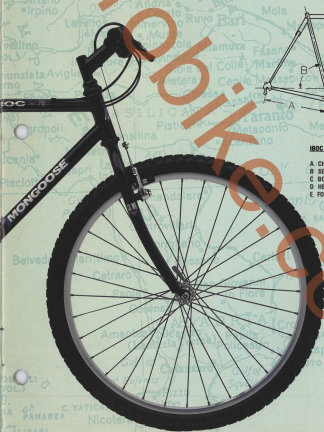

IBOC PRO

If you enjoy riding on the pinnacle of high performance, Mongoose offers the perfect bike — the 1991 IBOC Pro. Much of what we've learned about off-road cycling from our legendary professional mountain bike team has gone into the design of this sophisticated race winner. The IBOC Pro features our exclusive double-butted Tange chromoly monostay frame, anatomically proportioned chromoly handlebars, an IBOC stem, and an IBOC Gel racing saddle.

To help you conquer virtually any type of terrain, the IBOC Pro is equipped with all-new Araya CV-7 alloy rims, a Shimano Deore DX groupo with STI, and a rugged oversized headset with sealed mechanism bearings. Like the rest of our aggressive IBOC series, the Pro features Mongoose's distinctive new competition enamel paint finish, and our exclusive skinwall racing knobbies.

IROC SERIES GEOMETRY

- A. CHAINSTAY LENGTH - 430mm
- B. SEAT TUBE ANGLE - 72°
- C. BOTTOM DROP - 35mm
- D. HEAD TUBE ANGLE - 71°
- E. FORK RAKE - 45mm

IBOC COMP

The IBOC Comp delivers race-winning performance and reliability at an affordable price. Carefully assembled on the Comp's double-butted Tange chromoly frame is a Mongoose large-diameter chromoly fork with radius blades and leading axle dropouts, and an oversized sealed mechanism headset. The Comp boasts every technical innovation available from Shimano's Deore LX group: STL SIS, Superglide chainrings and sprockets, a Hyperglide freewheel, Rapidfire underbar shifters, and SLR braking. New high-performance Arays CV-7 alloy rims are standard equipment on this competition thoroughbred, as well as Mongoose toe clips and straps, an IBOC lycra/gel saddle, Mongoose all-terrain knobbies, and a chromoly IBOC handlebar and stem.

IBOC SPORT

For advanced recreational cyclists and aspiring off-road competitors, the IBOC Sport is the perfect multi-purpose machine. Like every great bicycle in the IBOC series, the IBOC Sport features our exclusive double-butted Tange monostay frame and competition-proven radius blade chromoly fork — standard equipment on today's professional ATB's. Reliable shifting and stopping are delivered by a Shimano 500LX groupo with Rapidfire STL. Other features of our most affordable IBOC include alloy wheels with Araya VP-20 rims, Shimano quick-release hubs, an IBOC lycra/gel saddle, aggressive 28x1.95-inch competition skinwall knobbies, an IBOC chromoly stem and handlebar, a rugged oversized headset, and Mongoose toe clips and straps.

ALTA™

Equipped with the latest components from the world's finest parts makers, the Mongoose Alta — our most popular ATB ever — delivers all the earth-churning excitement of our IBOC's at a more affordable price. The heart of the Alta lies in its Tange chromoly frame and chromoly fork with ovalized blades. The Alta delivers reliable braking from its narrow-profile Suntour cantilevers at the touch of your fingers. The Alta rolls smoothly over any terrain on Araya alloy wheels with quick-release alloy hubs. Long hauls on this rugged machine are easy, thanks to its exclusive Mongoose Biotex padded Maxi saddle with lycra cover, molded toe clips with nylon straps, and 26x1.95 inch fat ATB tires. Go out and ride — the Mongoose Alta can take it.

HILL TOPPER™

For the perfect balance of performance, value, and fun, look to the Mongoose Hill Topper. The Hill Topper's chromoly frame and fork is equipped with reliable Shimano 21-speed 200GS components with Rapidfire STI, Araya alloy rims, and quick-release alloy hubs. The Hill Topper features flat handlebars, an anatomically fitted stem, a cushioned all-terrain saddle, foam grips, and fat multi-track tires. Mongoose's Hill Topper is built to take you there and back.

SWITCHBACK

Versatility, performance, and comfort — the Mongoose Switchback delivers all three. Backed up by 18-speed Shimano SIS shifting, reliable front and rear cantilever brakes, a quick-release front wheel, alloy rims, and a comfortable lycra saddle, the Switchback is ideal for all-day metropolitan or off-road riding. No matter where you choose to ride it, the Switchback is a fun and affordable way to see the great outdoors.

ULTRA STORM™

The Ultra Storm delivers the form, function, and component selection of more advanced ATB's to small riders by integrating these features into a rugged machine with 24-inch wheels. The Ultra Storm's 12-speed Shimano SIS derailleurs, powerful narrow-profile cantilever brakes, alloy rims, aggressive all-terrain tires, and super tough T-bone design stem are designed to exceed the demands of first-time mountain bikers. For added comfort and style, this sophisticated all-terrain bicycle features a padded saddle with lycra cover.

ADVENT™ PERFORMANCE PRODUCTS

Advent Performance Products are designed by cyclists for cyclists. Each product offers unique features, excellent quality, and superior value. Attention to detail in fit, finish, and function ensures years of use and enjoyment.

Wedge pack, wet/dry pack, expanding wedge, seat pack, fanny pack, combination fanny/handlebar bag, and front & rear panniers

Advent Bicycle Bags are hand made of 1150 Denier Cordura and feature double-stitched seams, bar-tacked ends, quick-release buckles, YKK self-healing zippers and 3M reflective tape. Available in red, black, and blue.

Advent AC-1000 Cycle Computer monitors speed, average speed, distance, trip distance, and trip time. Features large, easy-to-read display, and unique "Compass Bar" control system. (Optional cadence monitor also available.)

Advent's Tabular Alloy Waterbottle Cage is constructed of high strength tubing. Weighs under two ounces. Available in black, silver, and white.

Advent Gel Saddles are soft and comfortable. Models available for Racing, Touring, ATB, and City/Hybrid.

Advent Cycling Gloves are hand made of soft, natural cowhide. They feature the unique tetraflex palm padding, lycra/ferry back, and velcro closure. Available in red, blue, and black in a full range of sizes.

The Advent Handy 10 is ten tools in one. It features 2mm through 6mm allen keys, flat and Phillips head screwdrivers, and 3, 4, & 10mm sockets with driver.

The Advent Air Hammer meets or exceeds ANSI Z90.4 and SNELL standards for bicycle helmets. Foam shell with lycra/nylon cover. Weighs under eight ounces.

DYNAMETRIC 735

Mongoose pioneered the fitness bicycle. When our engineering and product development teams researched riders' individual needs, they realized racing bicycles were too fragile and uncomfortable and that mountain bicycles were too heavy and slow to provide optimum efficiency and enjoyment. To bridge the gap, Mongoose has created a line of bicycles which combine the speed and simplicity of a racer with the comfort and versatility of a mountain bike to create the Dynametric line of fitness machines.

Every Mongoose Dynametric features a wide comfortable saddle, rugged frame construction, multi-speed gearing, lightweight 700x38C alloy wheels, and integrated computer performance monitoring. This unique combination of elements separates Dynametric bicycles from all others. The Dynametrics are designed for those who enjoy keeping fit in comfort.

FITNESS

Mongoose computer monitoring system

If high performance, high-impact crosstraining is an important part of your fitness regimen, the Dynametric 735 is the perfect machine. Like every Mongoose Dynametric fitness bicycle, the 735 is handcrafted and TIG welded, and features a responsive chromoly fork. It comes standard with new Suntour XCD LTD 21-speed derailleurs, a Mongoose computer monitoring system, radial tires, Araya 700C alloy quick-release wheels, a wide lycra gel saddle, anatomically proportioned frame dimensions, and new performance pedals with toe clips and straps. If fitness for life is your goal, the Dynametric 735 is your machine.

Radial beaded high performance fitness tire

DYNAMETRIC 525

The Dynametric 525 is a high-intensity fitness machine. It includes features available only from Mongoose. The Dynametric 525's frame and fork is constructed of chromoly tubing. It is equipped with Suntour XCM 12-speed derailleurs and new anatomic Suntour shifters. Other components include Araya alloy quick-release wheels, a Mongoose computer monitoring system, comfortable Krytox grips, and high-performance fitness tires. For dedicated fitness aficionados, the Dynametric 525 is the perfect bicycle.
