**MUDDY FOX** 

R E A R   S U S P E N S I O N

MUDDY FOX, pioneers in the design and development of Mountain Bikes, have, through constant research been responsible for ideas that have set new trends in Mountain Bike efficiency and performance.

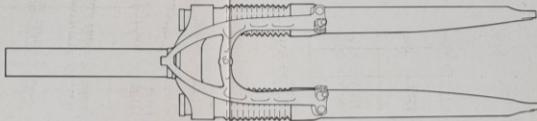

The surge of interest in Suspension Systems has produced a vast range of solutions, with varying degrees of efficiency -- and price.

At Muddy Fox we have been working away logically on a number of options which will provide optimum performance for different levels of Mountain Bike activity.

This is why our Rock 'N' Roll range has 3 types of front forks and incorporates a unique Dual Elastomer rear Suspension System which is adapted for both Alloy frames and CROMO frames. The DES® System has been designed to produce optimum performance by locating the lower pivot point on the bottom bracket and through a curved link to the rear triangle is rigid horizontally yet responsive vertically.

The dual elastomer buffers are progressive in compression and equally regressive on rebound. The system is simple and requires very little maintenance.

F R O N T   S U S P E N S I O N

The Muddy Fox MFX Front Suspension Systems utilise either Air/Oil, Elastomers or Springs, specially selected for optimum performance at various specification levels.

F O R K   O P T I O N S

Front Suspension units are also available as optional fitment to any of the "rigid" fork models and are recommended as follows:-

ALU TEAM  
ALU ULTIMATE  
MONARCH

Mountain Bicycle specifications can be bewildering. Your Muddy Fox dealer can advise on the appropriate model but for easy reference, when reading through this catalogue we have used four basic symbols to identify key areas.

Muddy Fox Aluminium frames are made from Heat Treated 7005 series Alloy, with high quality precision welding.

CROMO tubing is a carefully balanced amalgam of Steel, Chrome, Nickel, Molybdenum, and other elements to produce a frame that has the important balance between torsional rigidity and optimum weight.

Muddy Fox Bicycles have 18, 21 or 24 gears. All models use the latest SHIMANO under bar STI shifters.

Muddy Fox specify SHIMANO gears. The group set is identified by the appropriate SHIMANO reference.

PEDAL OPTIONS to meet the demands of riders who require clipless pedals, the SHIMANO SPD 737 and SHIMANO SPD 535 pedals are available as optional extras. The specifications pages at the back of the catalogue list the options.

I N N O V A T I O N   A N D   T E C H N I C A L   E X C E L L E N C E

Since its launch of the world's first complete range of Mountain Bikes in 1984, Muddy Fox have always been masters of innovation and technical excellence. This year is no exception. 1992/1993 will see the launch of :-

- MONARCH - Race ready with its Columbus Genius tubing. Monarch sets new standards.
- ROCK 'N' ROLL - Aluminium or Cromo frames with front and rear suspension.
- ALU SPORT - The first affordable, quality, aluminium Mountain Bike with penetrated seat tube and replaceable rear gear hanger.
- TRAILBLAZER - The first of its class with front and rear suspension.
- MIXTE - A new Mixte with a new unique frame design.
