# THE NEXT GENERATION !

**MUDDY FOX**, pioneers in the design and development of Mountain Bikes, have, through on-going research set standards in Mountain Bike technology.

The surge of interest in Suspension Systems has produced a wide range of solutions varying degrees of efficiency.

**MUDDY FOX** are now ready to lead the world into a new cycling era with their unrivalled range of **INTERACTIVE SUSPENSION** bikes. This unique concept, developed with British designer Dave Smart, is the only suspension system to give a better response than a rigid frame.

The Brisk acceleration of these bikes has to be experienced to be believed. Sprinting and climbing they deliver all the riders power to

the back wheel without inhibiting the free flow of suspension movement.

You have optimal traction and ground hugging control at all times .

This perfect balance, stability and power efficiency puts **INTERACTIVE SUSPENSION** in a class of its own.

The secret of **MUDDY FOX INTERACTIVE SUSPENSION** lies in linking front and rear to a single suspension mechanism thus achieving vertical travel on a horizontal plane, cannot dive through sudden breaking or hitting pot holes.

**The Perfect Cross Country Bike.**

**The Perfect Uphill Bike.**

**The Perfect Downhill Bike.**

**The Perfect Bike.**

The **MUDDY FOX  
INTERACTIVE** is one  
radical machine.

State of the Art Design  
has taken this bike  
from the drawing  
board to reality.

Our Craftsmen will  
build this bicycle to  
suit the customers  
individual  
requirements.

This is the bike others  
will try to imitate so  
move into the future  
and stay ahead of the  
pack.
