1995

## STRONGER THAN ALL

"Stronger Than All" is the name. Using the geometry of our Bicycle Motocross frame and fork and the strength of our Lengthy/Shorty frame and fork we have produced the new king of the 20"

world. 4130 Chromoly throughout, 1/4" dropouts, 1 1/2" top tube diameter, machined one-piece steer tube with 1 1/4" fork legs or oversized 1" head tube with a special S.T.A. Stem. Chief Boot Knocker Moliterno put in overtime to design this monster that also is available in custom sizes and custom paint. Stock with 990 mounts and cantilever mounts are also available. Other pluses are: peg mounts for the fork, the unique seat tube, top tube, and seat stay construction that blend the tubing into the highest quality frame and fork set ever produced on this planet.

To the right is a photo of the S.T.A. aluminum stem.

## FORKS

"How much will it take to feel safe?" Standard forks are the strongest forks manufactured today. A machined, one-piece, extra thick, chromoly steer tube are the center of the fork strength. Succulent 1 1/4" chromoly legs with 1/4" laser cut chromoly dropouts. Peg mounts are optional for the forks. Available in chrome only. Sizing for 1 1/2" head tubes available also.

To the left is a close up of our one-piece, machined, 4130 Chromoly steer tube and to the right is our 1/4" laser cut 4130 Chromoly dropouts. 100% made in the U.S.A.

## COASTER SHELLS

Standard produces this machined, one-piece 48 hole coaster brake shell. Made to work with Suntour® coaster brake parts. This is the strongest shell of its kind. Machined from solid steel into a Standard coaster shell and available only in Standard's show chrome

## STRIP BARS

Of course you know that Standard Strip Bars are made from 100% Chromoly. But do you know how strong they are? The two-piece Strip Bar is equipped with .065 tubing with a perfect bend for BMX or Freestyle. The innovative six-piece

Strip Bar is made from 1" tubing with 7/8" inserts for the grips and stem. Both bars offer a low cross-bar height. These are without a doubt the strongest and best feeling handlebars available today. Yes!

## HAND GRENADES

Producing the worlds greatest pegs isn't easy. It takes hundreds of hours to test, grind, and all out "try to destroy" our steel Hand Grenades. These puppies are big! 1 3/4" dia. by 4" wide add up to the number one peg used by flatlanders today! But how can you perfect the perfect peg? Make it out of aluminum! Hand Grenades are also available in lightweight aircraft aluminum (only 3 ounces per peg!).

Available in chrome plated steel or hand polished aluminum.

## 4 INCH AXLE PEGS

What can be said about these that haven't been said already? The often imitated but never duplicated Spaced Thread and Tight Thread have become what others measure all other axle pegs by. And these pegs measure at 4"x 1 1/4". Available in Spaced Thread for smooth grinds and Tight Thread to grip your shoe. Both styles have a lifetime guarantee against crushing and are available in a 5" length with 1 1/4" dia or 1 1/2" dia.. Available in chrome only.

## AXLES

Standard has saved you from disaster! These 4140 Chromoly heat-treated high-performance axles rule! Available in unsealed 24 thread, unsealed 26 thread, front sealed, and rear sealed sizing. Standard axles only prove the further success of the world's number one Freestyle/BMX bicycle company. Accessories galore!

Standard. It's more than high quality frame, fork, handlebars, and accessories. It's a deeply involved love affair. It's a virtually invincible relationship with thousands of riders who want a company dedicated to them. Standard Bykes makes riders feel the way they should feel: Important and boundless. Close to their hero's and dreams. What does it feel like to trust something completely? It feels like ecstasy.

## SHORTY AND LENGTHY

The 1995 Standard Lengthy<sup>®</sup> and Shorty<sup>®</sup>. The highest quality frame and fork set ever produced. Quarter-inch thick dropouts, Oversized tubing, Unique brake routing, head tube gusset, chainstay gusset, and machined one-piece fork steer tube are only a few of the features

offered on the frame and fork that made BMX PLUS! say "...The two years Standard put into testing this frame have definitely paid off big time...." The Standard Shorty<sup>®</sup> and Lengthy<sup>®</sup> frame has a lifetime warranty! The Lengthy<sup>®</sup> and Shorty<sup>®</sup> are available in triple plated show chrome and custom paint.

To the right is a photo of the optional fork peg mounts.

## BICYCLE MOTOCROSS

This is the number one BMX frame in the world today. A classic design with revolutionary technology. Tange Prestige and Reynolds 531<sup>®</sup> double butted tubing, chromoly 3/16" thick dropouts, 21" top tube length, tapered chainstays from 7/8" to 3/4", flared 1" seat tube, and

a 74.5 degree head tube angle prove that this frame rocks the free world. We don't stop there. Custom sizes, Custom materials (aluminum, titanium alloy, etc.), cantilever mounts, oversized 1" head tube with an aluminum Standard stem or a machined threaded steer tube just to name a few variations. Finishes available are triple plated show chrome, Robo Show Grey, Metallica Red, Flame Blue, or any custom paint or powder coated finish. Any takers?

To the right is a photo of the Bicycle Motocross aluminum stem.

They say you're only as fast as you are smart. Well you'd have to be a fool not to see the difference in Standard's Industrial Chain. By far the strongest chain available for BMX or Freestyle. Giant thick pins keep you together in your time of need. Don't be left behind with a broken chain...be ahead with a Standard Industrial Chain.

## INDUSTRIAL CHAIN

## MASTERGUARD

To serve and protect. The Standard MasterGuard has lasted while others have failed. Produced from bulletproof Kevlar™ the MasterGuard will help protect your sprocket and make your life easier. Mounting hardware included.

## KNARPS

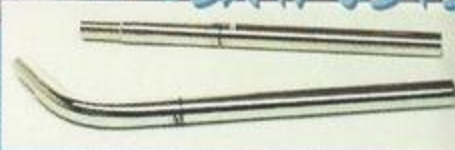

"Knarps, man...Knarps!" The little top Gyro cable shorteners. Just clip these on and worry not for they will last and last. And they even come with a custom allen wrench. So don't be a dork keep you cables short.

## GYRO HOOD

Standard Gyro Hood is a neoprene cover for your gyro. Keep your gyro clean by wrapping that rascal, protect yourself from the minor cuts and bruises caused by those sharp edges. Available in assorted colors.

## SEATPOSTS

Seatposts! Standard has got 'em. 100% chromoly shafts crafted by the experts. Made in the traditional 1" diameter with 7/8" inserts and unbelievable strength and durability. Available in chrome only.

## UNBREAK

Plop this piece into your coaster shell, replace your coaster brake shoes with this and you're set. The Unbreak will turn your hub into an anti-back pedal freewheel with no worries. Fakie to fakie baby!
