

ShokPost - the original Suspension Seatpost

It's true to say that many people believe suspension seat posts are the *new revolution* in suspension technology. This comes as no surprise at U.S.E. We are the originators of suspension seat posts, which we have been constantly improving for over six years. Our new ShockPost range offers you the lightest, simplest and most reliable suspension posts available. Whether you're after 'hard tail heaven' or 'on-road comfort' or even more out of your full suspension bike, the ShockPost is the perfect solution to your beaten butt !!

XCR
X-Country Racing

The new XCR

'Long travel junkies' delight - now has a full 51mm (2 inches) of available travel (awesome!).
Weight: only 385g - by far the lightest fully off-road suspension seat post available.

RX
Road Cross

The new RX

Specially built for road bikes, tandems, cyclo cross and light trail riding. 31mm (1.1/4 inch) of hyper-sensitive travel.

Weight: 324g (only 124g more than our regular Alu.350)

SX
Sport Cross

The new SX

The performance and reliability of the XCR but at a more affordable price. Custom coil spring upgrades available. 40mm (1.1/2 inches) of travel from our m.c.u. elastomers. Popular Sizes 26.8 / 27.0 / 27.2mm - no shim required.
Weight: 396g - only 9g more than the XCR.

Both XCR and RX have our new Custom Coil Spring / m.c.u. elastomer combinations to give ultra plush travel and shock absorption. All ShockPosts are 100% serviceable and carry U.S.E.'s full one year manufacturer's warranty.

"U.S.E. is the clear cut winner" - Mountain Bike Action magazine on testing 5 different suspension posts.

The Seat Post Company

In addition to ShokPosts we make quality, lightweight rigid posts in 7075T6 Aluminium (8 colours) and 3Al/2V Titanium. Race proven by professionals on and off-road.

Length	Weight Alu.	Tit.
220mm	164g	142g
350mm	214g	187g
420mm	240g	211g

ShokPost Accessories (L to R):

- 1 Shim - all sizes 25.4mm to 32.8mm
- 2 m.c.u. Elastomer Kit, Custom Coil Spring - Hard / Medium / Soft
- 3 Service Kit - Grease syringe / Bearings / Keys

Handlebars

7075T6 Aluminium with extended bonded shim for safety. 8 colours available. 580mm - 3° Bend or straight.

XCR X-Country Fork

The new generation of fork design. Many unique features make the XCR a dream to ride.

More Travel - 70mm (2.3/4 inches)

More Active - U.S.E. Custom Coil Spring and m.c.u. elastomer combo, as standard!

Low Weight - 3.2lbs. One of the lightest long travel XC forks.

More Tuning - Unique R.F.D. (Reactive Frequency Damping) air damping - total adjustment.

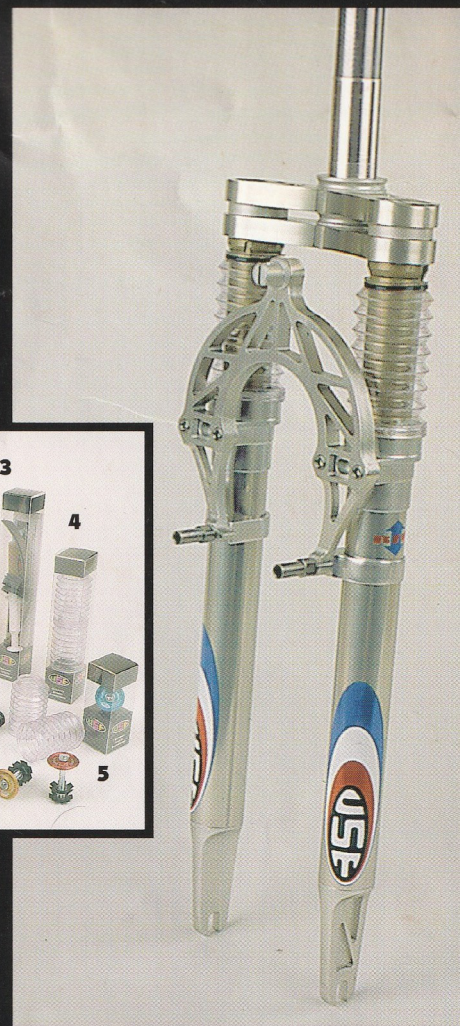

Best Materials - 7010, 7075 Al. and 6AL/4V Ti. Hardware

More Stiffness - twin plate crown; threaded stantions; 6 point fixing brace.

C.A.D. Design - Uncompromising C.N.C. quality

Fork accessories
