

WELCOME TO COVEBIKES

Cove Bikes is located in Deep Cove, North Vancouver, British Columbia, Canada where the radical and gnarly North Shore terrain provides no forgiveness.

Our designers and test pilots make a point of over engineering the frames to withstand the wildest ass-kickin' punishment the terrain has to offer.

Cove Bike was founded in 1981 by serious riders who had spent previous years racing in Southern California. Today, Cove mountain bikes are reliable, high performance, off-road bikes built to withstand brutal, insane trails that the craziest of North Shore freeriders haul ass on!

STIFFEE FR FRAME	\$788.00
- Handbuilt Aluminum True 6013 T.62 Tubing	
STIFFEE SL FRAME	\$888.00
- Handbuilt Aluminum True 6013 T.62 Tubing	
HANDJOB FRAME	\$588.00
- Handbuilt Columbus Tubing	
HUMMER FRAME	\$1,575.00
- Handbuilt Titanium 325 Aerospace Tubing	
G-SPOT FRAME	\$1,575.00
- Full-Suspension Aluminum	
- True 6013 T.62 tubing (Includes Fox Rear Shox)

Peeler DH

"Peels up the downhill course"

This year we decided to get illicit. Time to get into the downhill race, massive huck game. Nine inches of badass rear travel and a brand new suspension platform that's big enough and bad enough to deal with everything from World Cup downhill courses to Dangerous Dan-sized hucks.

The technology still uses our revolutionary around the bb main pivot but with a rear suspension angle that enables a plush, rising rate of travel. No pedal feedback or chain slack.

Currently the Peeler is in the development stages, but a super-oversized aluminum frame set made from 6013 T62 aluminum and a Fox Vanilla RC shock has shown considerable promise when tested by our factory riders in World Cup and Canada Cup downhills. Look for this beauty at a race near you.

(NOTE: The new Peeler won't be available till early Spring 2002)

Hooker SL

" Built to hook the gates "

New this year, Cove Bikes introduces the Hooker, our knock-out dual slalom ripper. Capable of taking four inches in the rear, the Hooker is irresistible to the raddest of rippers. It's the perfect tool for big kickers and innovative to-transition ahrs.

A dramatically sloping top tube, gusseted front-end and new suspension platform that joins the lateral stiffness of an around the bb main pivot with a travel arc that keeps chain length the same, the Hooker's one of the coolest race bikes we've ever designed. If you're into to pushing your limits, get it on with a Hooker.

(NOTE: The new Hooker won't be available till early Spring 2002)

G-Spot

" Costs a little over a grand and is hard to find "

First introduced in 1999, the G-Spot has fast become one of the most sought after dual suspension freeride bikes in the world. From hucking to hauling, log rides to long rides, the G-Spot caters to your every need. Six inches of rear action, sealed bearings on all pivot points, a perfectly balanced swing arm and an around the bb main pivot that eliminates pedal feedback and keeps chain tension even are just some of the G's sweeter features.

* * New this year we're building the front triangle out of bomber Easton RAD tube aluminum, creating a stronger, stiffer front-end that can handle the triple crown forks for the triple crown drops. With the choice of either a Fox Vanilla TC or a Fox Vanilla Air rear shock, there's no reason to worry about dangerous wet conditions, as most expert G-Spot riders claim, the wetter the better.

WELCOME TO COVEBIKES

Stiffie FR

This is the Stiffie FreeRide.
You want one.

Handjob

The DC Handjob is an exclusive product of Deep Cove Bike Shop. Handcrafted from prestige O.S. Tange tubing. Includes Ritchey BB Shell and dropouts.

Our cool snake stays, top tube cable routing and a ripper custom paint job. Attention to detail and handmade geometry make the DC Handjob a high performance bike that'll haul ass!

Hummer XC

The DC Hummer XC is an exclusive product of Deep Cove Bike Shop. Handcrafted from Sandvik Ti-3Al-2.5V Grade-9 Titanium tubing makes the Hummer one of the lightest and strongest high performance race bikes on the circuit.

The unique chain and seat stays allows the Hummer to accomodate the fattest tires the industry has to offer. Attention to detail and handmade geometry make the DC Hummer a high performance bike that'll haul ass!
