62	58.8	71.8°

Eddy Merckx Custom Frames

Custom built frames are an Eddy Merckx tradition. In cases where Eddy's standard geometry does not fit the rider, it is possible to have the frame of your choice built to measure. This process requires several months, but allows for perfect fit. Frame measurements are determined according to a set of body measurements you provide on a special form. Contact your dealer for further information and ordering details.
