

**STRENGTH.** Inspired by aircraft design and proven in Formula One, the monocoque technology on Mountain Cycle frames like the ShockWave 9point5 is state of the art.

**CONTROL.** Increased velocity demands equally advanced brake technology. Our optional floating disc kit eliminates brake-jack for massive stopping power and superior suspension performance.

**VERSATILITY.** The ShockWave 9point5's standard 12mm thru-axle and optional 10mm Q/R dropouts make it compatible with a variety of hub and drivetrain set-ups.

**PERFORMANCE.** We engineered our race-bred RLS2 suspension to absorb everything from massive hits to high-speed stutter bumps.

# YOUR SEASON PASS TO THE PODIUM. SHOCKWAVE 9<sup>POINT</sup>5

There may be three spots on the podium, but you've only got one chance to get it right. Improve your odds aboard the radical ShockWave 9point5. For hard-core downhill competition, nothing's faster or stronger. For a test ride, visit your authorized Mountain Cycle dealer.
