# 2012

...oh well! What can we say? ...Some say it's going to be the end of the world! Is it true? Will everything grind to a halt at the end of the year in a thermonuclear supersonic microwaved bionic laser supernova power blast? Now that would be one hell of a party...

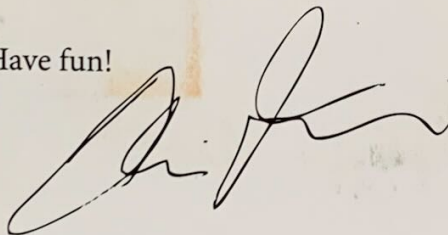

So while we all still alive, let's get back to the fun stuff: BMX! ...These three little letters inspire us again and again and keep us from becoming rusty!

We're sure you've seen last year's first ever 3D BMX catalogue (we hope it's still lying around somewhere in your room underneath all those bmx mags). Pssst! ...Come closer... Here's our newest effort! The first ever pop-up BMX catalogue in BMX History!

First there was a catalogue, then there was a 3D catalogue, now we have the pop-up catalogue... What will be the next thing to pop out of our greasy heads?

Innovation on ALL fronts - that's what Stereo Bikes stands for! And we think that is nicely reflected in our 2012 bikes and parts lineup!

Have fun!
